Important events to be reported: Product launch

BRK Financial Group expands the addressability of the offered products and services, developing and launching in this regard the product "Investment account for children" through which parents (or legal representatives) can open a trading account for minors. In the same way, we offer parents a simple and safe way to invest in their children's future.

The development of this product is a natural step in achieving BRK's goal of contributing to education in general and financial education in particular and comes in the context in which we have noticed a high interest among very young people in the capital market. The main benefits, related to accessing this type of account, are that parents can contribute in advance to the child's financial independence and can lay the foundations of a stock market education that can turn them into successful future investors.
