## A WORD FROM THE CEO

Dear shareholders,

**We have published the preliminary financial statements for 2020 today.** The past year has been a year in which BRK has proven resilience in a challenging and competitive market environment and has managed to obtain a solid financial performance while continuing the upward trend of the past 24 months. Our continuous business change has registered significant progress, with a focus on increasing the total number of clients and improving their digital experience, on bringing innovative services to the issuers, scaling the business, as well as striving to use our competitive advantages such as over 10 years of experience in market making.

We hereby report a **2020 net profit of RON1.87 million**, taking into account what a difficult year this has been, with a loss of RON5.24 million during the first 6 months, followed by a strong rebound during the third and the fourth quarter of 2020 (RON4.22 million Q3/2020 profit, **RON4.1 million** profit in Q4/2020), significantly surpassing the budget projections that were made in April – when the portfolio was yet to be impacted by the market corrections.

BRK broke-even from the intermediation and market making income. These revenues cover all operational costs, **the result from continuing operations being RON +1.13 million**. On top of these, another **RON748 thousand** is added as the net result from own account trading (house).

With respect to our expenses, the only significant increase is related to the commissions of the stock exchanges in which BRK intermediates transactions, which have increased as well. **Our staff related expenses have decreased by 10% as a direct consequence of our personnel efficiency program.**

### Intermediation segment

Each of the 3 intermediation segments (domestic market trading, international market trading, services addressed to issuers) **generated an income at least double compared to the previous year, so that all revenues from the intermediation segment reached the level of RON8.3 million (vs RON3.8 million / 2019)**, increasing by 114% compared to the previous year. Among the growth catalysts we mention the ascending evolution of the number of newly opened accounts, but also the increase of the value of transactions made by existing customers, BRK intermediating transactions totaling RON1.38 billion on BVB in 2020 (vs. RON 616 million in 2019, + 124%) . As to the market positioning, BRK was the 7th place in the top of intermediaries on BVB, the market share increasing from 2.53% in 2019 to 3.70% in 2020. The exponential growth of fees related to transactions on international markets as well as the quantitative increase of primary market operations offered to issuers.

## Market making and asset management

We report a net result of RON3.94 million from market making operations (vs RON1.2M / 2019) increasing by 228% compared to 2019, in line with the evolution of revenue from structured products (RON347 million in 2020 compared to RON87 million in 2019). We appreciate that the volatility that characterized the stock market context in 2020 contributed to the increase in revenues from structured products, as well as the diversification of the product range by including commodities (gold, silver, oil) as underlying assets.

Contributing to this result are also the revenues from the contracts with issuers regarding **the issuer's market maker** service, which became more and more consistent in the second half of the year, with a maximum in December, when BRK's client portfolio reached six customers for this service.

Other transactions carried out on own account (where we include transactions with financial instruments, re-evaluation of subsidiary holdings, interest income, coupons and dividends, exchange rate differences, interest expense, marking of market positions in the portfolio - generally the related transactions market risk) recorded a result of RON +748 thousand. Own-account transactions were the main cause of reported losses on interim reports at 3 and 6 months, respectively (especially the effect of branding portfolio positions), but overall we managed to recover losses in Q3 and Q4, a large part from the value of the own portfolio being correlated with the evolutions of the local and / or international stock market indices.
